the league of the iroquois the most famous native government in north america dominated intertribal diplomacy in the northeast and influenced the course of american colonial history for nearly two centuries the age and early development of the league however have long been in dispute in this highly original book two anthropological archaeologists with differing approaches and distinct regional interests synthesize their research to explore the underpinnings of the confederacy wonderley and sempowski

endeavor to address such issues as when tribes coalesced when intertribal alliances presaging the league were forged when the five nation confederation came to fruition and what light oral tradition may shine on these developments this groundbreaking work develops a new conversation in the field of indigenous studies one that deepens our understanding of the iroquois league s origins

many animals build shelters but only humans build homes no other species creates such a variety of dwellings drawing examples from across the archaeological record and around the world archaeologist jerry d moore recounts the cultural development of the uniquely human imperative to maintain domestic dwellings he shows how our houses allow us to physically adapt to the environment and conceptually order the cosmos and explains how we fabricate dwellings and in the process construct our lives the prehistory of home points out how houses function as symbols of equality or proclaim the social divides between people and how they shield us not only from the elements but increasingly from inchoate fear

sponges phylum porifera are known to be very rich sources for bioactive compounds mainly secondary metabolites main efforts are devoted to cell and mariculture of sponges to assure a sustainable exploitation of bioactive compounds from biological starting material these activities are flanked by improved technologies to cultivate bacteria and fungi which are associated with the sponges it is the hope that by elucidating the strategies of interaction between microorganisms and their host sponge by modern cell and molecular biological methods a more comprehensive cultivation of the symbiotic organisms will be possible the next step in the transfer of knowledge to biotechnological applications is the isolation characterization and structural determination of the bioactive compounds by sophisticated chemical approaches
