This new book offers a timely and lively appraisal of the concept of communicative repertoires: resources we use to express who we are when in dialogue with others. Each chapter describes and illustrates the communicative resources humans deploy daily but rarely think about: not only the multiple languages we use but how we dress or gesture, how we greet each other or tell stories, the nicknames we coin and the mass media references we make, and how these resources combine in infinitely varied performances of identity. Rymes also discusses how our repertoires shift and grow over the course of a lifetime, as well how a repertoire perspective can lead to a rethinking of cultural diversity and human interaction, from categorizing people's differences to understanding how our repertoires can expand and overlap with others, thereby helping us to find common ground and communicate in increasingly multicultural schools, workplaces, markets, and social spheres. Rymes affirms the importance of the communicative repertoires concept with highly engaging discussions and contemporary examples from mass media, popular culture, and everyday life. The result is a fresh and exciting work that will resonate with students and scholars in sociolinguistics, intercultural communication, applied linguistics, and education.

Studying language in interaction is a holistic practical guide with a hybrid purpose: to emphasize a particular approach to language in the world; a theory of language that has room for communicative repertoire and sociolinguistic diversity; and to provide a practical guide for new researchers of language in interaction. Each chapter focuses on one way of communicating, providing a set of strategies to observe, note, and reflect on context-specific ways of using multiple languages: of sounding, naming, using social media, telling stories, being ironic, and engaging in everyday routines. This approach provides a practical guide without stripping out all the wonder and nuance of language in interaction that originally draws the novice researcher to critical inquiry and makes language relevant to the humans who use it every day. Studying language in interaction is not only a practical research guide; it is also a workbook for being in the world in ways that matter, illustrating that any research on language in interaction involves both tricks of the trade and a sustained engagement with humanity. With extensive pedagogical resources, this is an ideal text for advanced undergraduate and graduate students of sociolinguistics, intercultural communication, linguistic anthropology, and education who are embarking on fieldwork projects.
