Dynamic capabilities are the organizational processes that sense, seize, and reconfigure internal and external resources to maintain a competitive advantage. This article delves into the intricate relationship between dynamic capabilities and strategic management, illustrating how they are crucial for fostering innovation and driving sustainable growth.

Understanding Dynamic Capabilities

The seminal work of Teece, Pisano, and Shuen (1997) defined dynamic capabilities as the firm's ability to integrate, build, and reconfigure internal and external competences to address rapidly changing environments. This involves three core processes:

- Sensing:** This involves identifying and interpreting opportunities and threats in the external environment. It requires market intelligence, customer understanding, and technological awareness. Companies like Netflix, for example, masterfully sensed the shift towards streaming video, seizing the opportunity before their competitors.
- Seizing:** This is about acquiring and leveraging resources to capitalize on identified opportunities. This involves making strategic investments, forming alliances, and developing new products or services. Apple's successful seizing of the smartphone market with the iPhone 2 is a prime example.
- Reconfiguring:** This
