activation imposes a variety of costs on reservists among those costs is a potential decline in earnings during the period

of activation in this study and researchers compute how earnings change when a reservist is activated using administrative data on military and civilian earnings obtained from the department of defense dod and the social security administration ssa the study employs a comprehensive measure of annual earnings and covers the experiences of virtually all reservists activated in support of the global war on terrorism through 2003 contrary to conventional wisdom and dod survey evidence the rand study indicates that on average the earnings of reservists increase substantially when activated moreover earnings gains increase length of active duty service some reservists do experience an earnings loss when activated but the probability of experiencing an earnings loss declines with length of active duty service even so these large earnings gains may be insufficient to compensate reservists for the hardship of active duty

either side from gaining control of the entire peninsula resulting in a stalemate while issues of relative strength and weakness hindered u s korean cooperation after the end of the second world war once war came to the region the two powers built a successful partnership that addressed the national interests of both parties
